Two parish options, alongside RCCG

A practical draft using an existing emblem reference · teal + sand working parish palette

Shared Rhythm

Light background

Dark background

Open Praise

Light background

Dark background

The complete emblem stays separate and keeps its original colors. White light surfaces and a padded white panel on teal preserve the full source image. The parish contours, full name and 93% Open Praise optical scale stay unchanged.

The emblem file is included in the ZIP

Existing PNG preserved byte-for-byte. No redraw, tracing, recoloring, crop or background removal.

Native 236×236 PNG reference. Source resolution limits large print use.

What this preview establishes

Shared Rhythm's open, angular planes balance the denser circular seal. Open Praise offers a compact alternative; its smaller optical scale helps the two identities stay independent.

The teal parish ink can sit beside the emblem's full color without borrowing or changing the parent colors. Gold is omitted from these formal pairings.

What remains open

This is a sourced reference copy, rather than the exact 1200×1200 image shown in chat. The original upload's checksum is not verified. Final authorized source artwork, ring-letter readability at small sizes, physical print reproduction and final lockup approval remain open.

Reference source: https://github.com/RCCG-WayForwardProject/rccg-wayforward/blob/b053a99345e9178e23db06ac35b9529006684480/public/logo.svg
PNG extracted unchanged from the source SVG's embedded image; reference-source SHA and package hashes are recorded in the manifest.

The ZIP contains the standalone PNG, four self-contained paired SVGs, this review PDF and the comparison PNG. The reference raster remains at its native dimensions; the previews do not create a higher-resolution emblem.

To rebuild, run source/build.py from the repository with the recorded reference asset and frozen refinement 11 masters available. No image-generation tool or external font is needed.
